### Personal Statement

I am passionate about this work because it sprang from my own re-ordering of my financial life. My path was through classes and free seminars, conversations with financial planners and tax advisors, and finally found my way to an effortless money life. Having achieved my goal, I was amazed at the change in how I felt about myself and how my stance toward the world improved. From that time on, I've felt compelled to help others find their own way to this same confidence and power.

I teach simple tools for effortless and sustainable cash flow and money management, and guide my clients to balanced attitudes and beliefs about money and success. *Freedom from fear around money is no small change.*®
